

PRODUCT INTRODUCTION

Mesh Mist Eliminators

Mister Pad - Metal and Plastic Materials

- Features of demister pad
- Simple structure.
- Lightweight and easy to transport.
- High porosity, less pressure drops.
- Large surface area and high separating efficiency.
- Easy to install, operate and maintain.
- Durable and long service life.
- Corrosion and rust resistance.

Specifications of mister pad

- **Material:** copper wire, monel wire, nickel wire, stainless steel wire, plastic wire.
- **Wire diameter:** 0.2 mm, 0.22 mm, 0.23 mm, 0.25 mm, 0.28 mm, 0.3 mm, 0.35 mm.
- **Mesh size:** 2 mm × 3 mm, 4 mm × 6 mm to 12 mm × 6 mm.
- **Height or thickness:** 100 mm to 150 mm.
- **Pad diameter:** 300 mm - 6000 mm.

According to the material

Metal mister pad.

Plastic mister pad.

According to the shape

Round shape mister pad.

Rectangular shape mister pad.

Ring shape mister pad.

Special shape mister pad.

According to the component

Knitted mesh mister pad.

Knitted mesh and grating mister pad

Knitted wire mesh, supporting mesh and grating type mister pad.

Knitted wire mesh, supporting mesh and frame type mister pad.

According to the structure

Integrated mister pad.

Integrated mister pad.

According to the grating type

Round bar mister pad

Flat bar mister pad

Round and flat bar mister pad

Standard knitted wire mesh mister pad

Ginning knitted wire mesh mister pad

According to the knitted wire mesh type

Standard knitted wire mesh mister pad.

Ginning knitted wire mesh mister pad

Features of PP demister pad

- **Lightweight.** The density of PP demister pad is $0.90 - 0.91 \text{ g/cm}^3$, it is one of the lightest material in the plastics.
- **High temperature resistance.** the PP demister pad can maintain good condition in max. $150 \text{ }^\circ\text{C}$.
- **Chemical stability.** The PP demister pad has outstanding corrosion, acid, alkali and various chemical agent.
- Low pressure drop.
- Good mechanical property.
- Good strength and hardness.
- Excellent elasticity.
- High filtering and separating efficiency.
- Convenient for installing and uninstalling.

Types of PP demister pad

- Rectangular shape PP demister pad.

Round shape PP demister pad.

Rectangular shape PP demister pad.

According to the structure

Standard PP demister pad.

Standard PP demister pad.

Vane Demister Pad - Metal or Plastic Materials

- **Vane demister pad**, also called vane mist eliminator, chevron demister pad, it consist of several zig-zag chevron blades with certain spacing. The blade profile can be smooth or with hooks. The smooth blade is commonly used for non fouling services and the hook blade can supply greater removal efficiency and capacity.

According to material

Metal vane demister pad

Plastic vane demister pad.

According to the blade type.

Smooth blade vane demister pad.

Hook blade vane demister pad.

According to the shape

Round shape vane demister pad.

Rectangular shape vane demister pad.
