

Automated Oil dispensing system is useful for dispensing of exact volume of oil by automatic PLC controlled system. Included oil filtration unit with strainer and magnetic filter.

## Applications

- Assembly Lines
  - Automobile
  - Tractor
  - Engine
  - Transmission
- Shop Floor
- Workshops / Service Stations
- Cement / Steel Plants

## Features

- Dispensing gun with no spill device
- High precision flow meter for accurate measurement
- Oil barrel empty indication on PLC with machine auto switch off feature

## Installations

One Time Installation, Lifelong Saving

## Benefits:

- Track daily oil consumption on shop floor & control oil cost
- Accurate dispensing which can be easily set on PLC
- Portable mobile unit for ease of dispensing
- Avoid spillage while dispensing
- Convenient & fast dispensing of oil
- No over or under filling of oil
- Includes inline filter with strainer & magnetic filter
