

FUH015 SERIES

Transfer and filtration portable unit

TECHNICAL SPECIFICATION

MAIN:	Flow Rate: 15 l/min Operating temperature: from 0 °C to +80 °C Fluid viscosity range: 10-220 cSt
ELECTRIC:	Voltage: 230 V Frequency: 50 - 60 Hz Power consumption: 0.25 kW
FRAME:	Dimensions L, W, H [mm]: 290 x 368 x 533 mm Dry Weight: 16 kg
MATERIALS:	Base frame: Painted steel

ELEMENT

	tested according to ISO 11170, 2941, 2942, 2943, 3724, 3968, 16889, 16908, 23181
FILTER MEDIA:	Fiberglass: G03 - G06 - G10 - G25 Fiberglass with water removal: GW03 - GW06 - GW10 - GW25 Paper: C25 Paper with water removal: CW25
FLUID COMPATIBILITY:	Full with HH-HL-HM-HV HETG-HEES (acc. to ISO 6743/4). For use with other fluid please contact Filtrec Customer Service (info@filtrec.it).

The unit is supplied complete with an Instruction and Maintenance Manual available on our website www.filtrec.com in the "Hydraulic Filter" section. The unit can be used by authorized operators who have read and understood all of its contents.

The FUH015 filtration unit is certified

FILTER ELEMENT - Preferred models - For the complete range of elements available, refer to the FA1 series catalog for size 20 and 21, and catalog FAH-A150 for size 50.

OVERALL DIMENSIONS FILTER ELEMENT

USER TIPS

The filter element must be replaced when:

1. the oil transfer is completed (if used as oil transfer unit).
2. the target cleanliness class is reached (when used as off line filtration unit); more filter elements could be necessary to reach it, depending on the oil volume to be cleaned and from the initial contamination level.
3. the clogging indicator shows.
4. a different filter media is required. We recommend a fine filtration; filter elements for water removal available when needed.

The unit is supplied complete with an Instruction and Maintenance Manual available on our website www.filtrec.com in the "Hydraulic Filter" section. The unit can be used by authorized operators who have read and understood all of its contents.
